About Me

Ciao, I'm Iacopo Ciao! Exactly: like the greeting!

I'm a full stack developer very skilled in problem solving and architecture design, with an eye on code style and SOLID principles.

My work reflects my love for my profession through the creation of effective and elegant solutions, my meticulousness through flexible and maintainable code, strongly inspired by authors such as Robert C. Martin, Vaughn Vernon and Eric Evans.

My colleagues define me as a senior who never stops at the first answer and always tries to go into the substance of the issues.

What am I looking for?

Always striving to improve, I love learning new things and face challenging problems. In my experience I have always found a friendly and homely environment, even in large companies. I like to help my colleagues and I love to work with my team to find the effective solution to the use case in analysis. I'm always looking for the next challenge and I would like to be part of the solution process.

Education

Programmer analyst diploma 2014 - Leonardo da Vinci industrial technical institute.

Pro Skills

Agile Thinking

Design Patterns

Angular

Approachability

Node

Code Review

Spring

Passionate

Highlighted Experiences

DsTech

2021-04-01 - Present • 1 year 3 months
Rome, Lazio, Italy

Cards - Accenture 1 year 2 months

application for managing card request and issue workflows

ROLES

- Full-Stack Engineer

Waterfall Java Javascript Typescript SQL JSON CSS SCSS HTML Spring Springboot
